repairs & upgrades

Case Study

We decided to purchase a new scoreboard and after a look through various companies websites, the professionalism of their website, and the quality of work on show led us to contact FSL. After an online query we were swiftly contacted by sales rep Marty, who showed us various options to consider.

Once we had made our mind up on the board we wanted, Marty then came out and met a few of us on site to see all our requirements and give us his opinion on location etc. He also talked us through all the work we would have to do before installation. We then placed the order, and the scoreboard was delivered on time and exactly as described. Also the drawings that FSL provided for us to make the steel frame and to install the concrete base were excellent and made this job very easy. I would definitely recommend any club in need of a scoreboard to go with FSL.

Additional Services

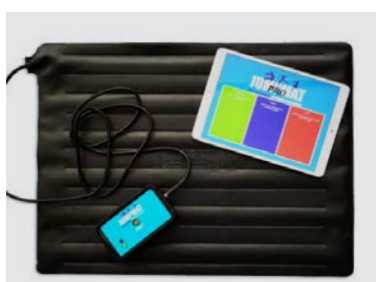

FSL supply scoreboards and digital solutions to a wide variety of sports.

Other Applications

- Soccer
- Cricket
- Rugby
- Hockey
- Bowls
- Basketball
- Schools

Jump Mats

Accompanied by our unique app, the JumpMat has the ability to store, analyse, export, and present athletic data so you don't have too! Through the use of timeline graphs and over 24 Jump Modes, you will be able to create your very own reports to show the effectiveness of your training programmes.

Sub Boards

Our Double-Sided Sub Board is equipped with Ultra-Bright LEDs suitable for outdoors, with red LED's for exiting players, and green for entering. The board is controlled through a sturdy membrane label, making it weather resistant. You can also pre-program your substitutions (up to 6), making it simple to recall them.

Timing Gates

Forget the stopwatch and bring your training to the next level with the Beam Trainer timing gates system. It is designed for accurately tracking time in sports, especially for timing sprinting events and drills, testing speed in sports such as GAA, rugby, football, hockey basketball and athletics.
