know the score...

1) Scoreboard connections:

- The scoreboard should be supplied with a 230V mains supply.
- The mains supply should be fed through a 5 amp circuit breaker and it is highly recommended that the supply should be fed through a Residual Current Device (RCD)
- If the scoreboard has been supplied with a separate aerial this should be mounted as high as possible

2) On Power Up:

- 'Cd - ' will be displayed for 5 seconds
    - o This is a "code" number stored in memory
    - o There are 5 possible codes that may be used, this allows a number of displays to be operated in close proximity of each other
    - o Further details on programming the code can be found at the end of the manual

- The scoreboard will now go into normal operation, displaying scores with the clock blanked.

3) Changing Scores:

1. To increase the score press the button
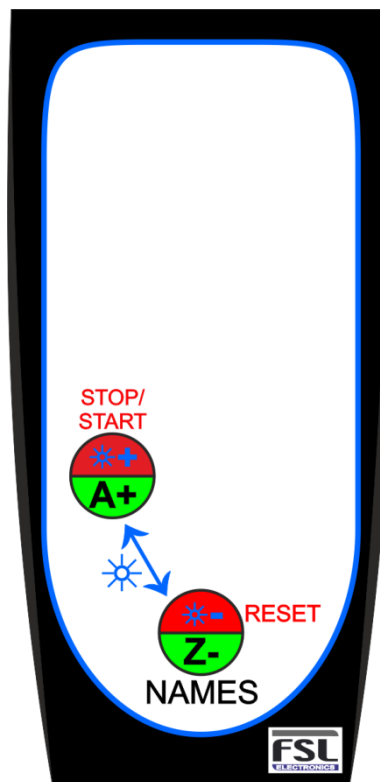

2. To decrease the score press the button

3. To clear the score press the & button together
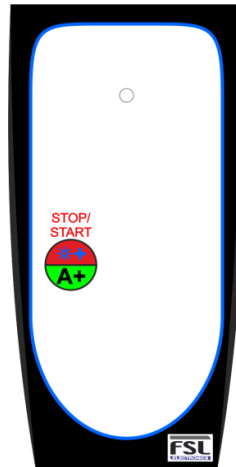

4) Brightness Setting:

- To access brightness setting, hold buttons **A+** & **Z-** on the handset together for 3 seconds until 'bl - ' is displayed

- To exit brightness setting, hold buttons **A+** & **Z-** on the handset together for 3 seconds until the scores are displayed again
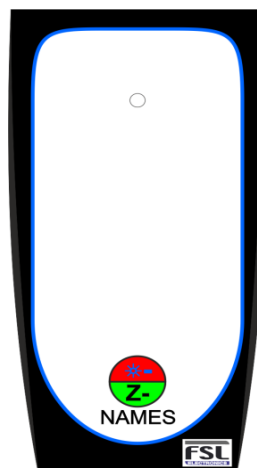

Increasing Brightness:

- While 'bl - ' is displayed, increase brightness with button
- The maximum brightness is 9

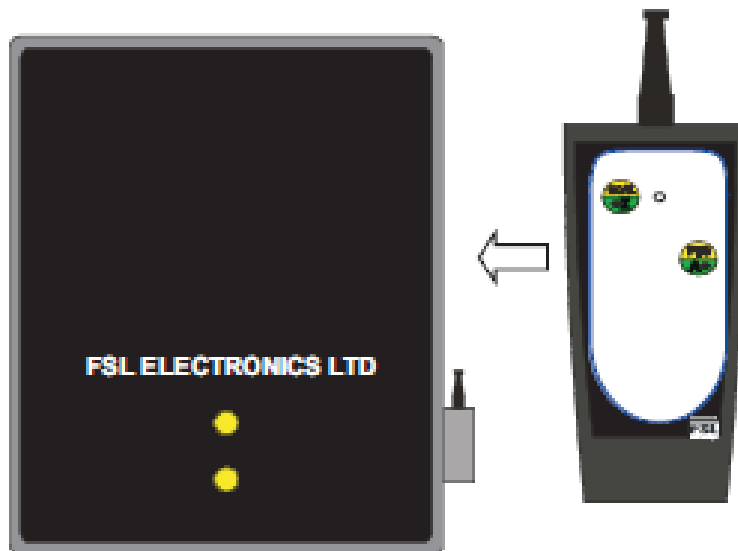

Decreasing Brightness:

- While 'bl - ' is displayed, decrease brightness with button
- The minimum brightness is 0

- To exit brightness setting, hold buttons & on the handset together for 3 seconds until the scores are displayed again

- ## 6) Scoreboard Blank:

To blank the scoreboard display, press the & The score will be restored if any score button is pressed

7) Time Mode Menu:

- To access **'Time Mode Menu'**, <u>hold</u> button for 3 seconds until **'tu'** is displayed

- Pressing button will scroll through the 3 time menu options, displayed as :

    - **'tu'** – Timer up in minutes and seconds
    - **'td'** – Timer down in minutes and seconds
    - **'bn'** – Blank/clear the clock

- While displaying one of the time options above, <u>holding</u> button for 3 seconds will go into that corresponding option

NOTE: 'Time Mode Menu' cannot be accessed when brightness is being set

7.1) While in 'tu' (Timer Up in minutes):

NOTE: Defaults to 0 minutes, no setting of timer up is required

- When "Se" then "St" appears on the screen, this indicates to set the start minutes

- Press button to **INCREASE** the minutes

- Press button to **DECREASE** the minutes

- Hold down the button for 3 seconds, until "Se" then "SP" appears on the screen, using the same increase and decrease button, set the Stop time.

- To store and display the **'Timer Up'**, <u>hold</u> button for 3 seconds

  - Press button to **START/STOP** the timer

o **ONLY** if timer is STOPPED press button
to **RESET** the timer to what it was previously set

*While displaying the **'Timer Up'**, <u>hold</u> button* *for 3 seconds to go into the **'Time Mode Menu'** again*

7.2) While in 'td' (Timer Down in minutes):

- The timer setting that can be changed will flash

- Press button to switch through minutes and seconds setting

- Press button to **INCREASE** the minutes/seconds

- Press button to **DECREASE** the minutes/seconds

- To store and display the **'Timer Down'**, <u>hold</u> button for 3 seconds
