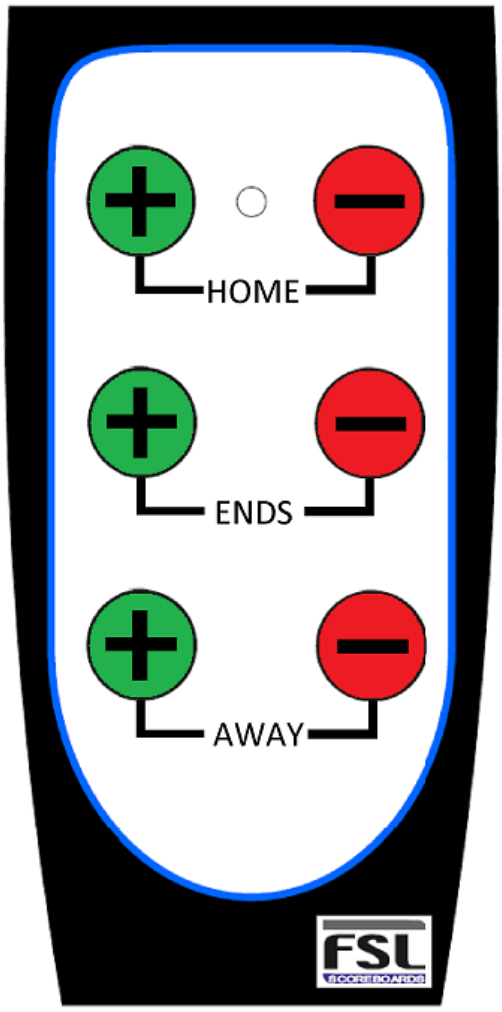
know the score...

Minigrip Preview



1.) Scoreboard on Power Up

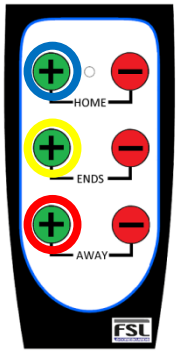
- The scoreboard has no power switch and is simply powered on and off at mains supply.
- The scoreboard will take around 20 seconds to start; it is ready when all displays are showing scores
- The last score is saved and will be shown when restarted.

2.) Scoring

Each rink has a designated mini-grip remote containing seven buttons. There are three rows containing two buttons.

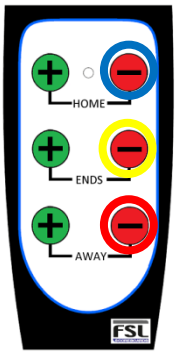
2.1) Incrementing

- To increment the “Home” Score on the rink, press the top “+” button, shown by the blue circle
- To increment the “Ends” Score on the rink, press the middle “+” button, shown by the yellow circle
- To increment the “Away” Score on the rink, press the bottom “+” button, shown by the red circle



2.2) Decrementing

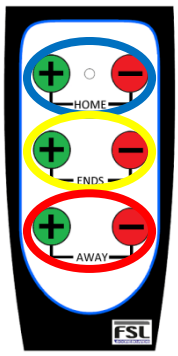
- To decrement the “Home” Score on the rink, press the top “-” button, shown by the blue circle
- To decrement the “Ends” Score on the rink, press the middle “-” button, shown by the yellow circle
- To decrement the “Away” Score on the rink, press the bottom “-” button, shown by the red circle



2.3) Resetting

To reset a value for a rink hold both buttons in the corresponding pair for the configured hold time.

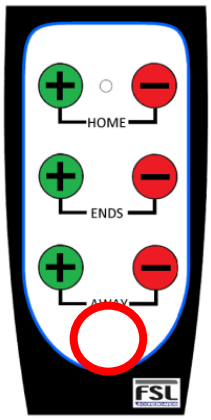
- To reset the “Home” value for a rink hold both the left and right buttons (indicated with the blue circle) on the top row of the remote for that rink for 3 seconds.
- To reset the “Ends” value for a rink hold both the left and right buttons (indicated with the yellow circle) on the middle row of the remote for that rink for 3 seconds.
- To reset the “Away” value for a rink hold both the left and right buttons (indicated with the red circle) on the bottom row of the remote for that rink for 3 seconds.



3.) Configuration

To enter the configuration menu press and hold button 7 on the remote for 5 seconds.

This is an unmarked button as highlighted below



To move through the different setting menus press the ENDS + and - buttons

Brightness.

```
Brightness
>12
```

Factory Reset

To do a factory reset of the unit press and hold the HOME + and - button for 3 seconds
This will return the Unit to the Factor Defaults.
Brightness = 12 (This is not implemented until the power is reset)
Font Type = Seven Seg
Prod Mode = Rink
Rink No. = 1
Group No. = 1
Cust No. = 1

Please note that this will also reset the LED display type when the display power is reset.
This can be changed by turning the power off to the unit and back on again.
You must then wait for the boot message to finish and then press the button on the rear of the display 11 times within 30 seconds.
